PROFESSIONAL EXPERIENCE

SS&C Technologies, Inc., Mumbai, India   Sep 2020 - Present
Position: Lead Software Engineer
Project: Digital Investor (DI)
DI is a multi-tenant web application built with modern technologies such as React 18, HTML5, Tailwind, SCSS, RxJs, Redux and NestJS currently serving 52 banks worldwide and delivering solutions to 55 million customers. The application enables end users to verify their identity, create various types of bank accounts, and manage investments.
Responsibilities:
- I translated customer and system requirements into scalable, test-driven software designs, developing advanced digital investment portals using React for leading global financial institutions.
- Collaborated with cross-functional teams, I ensured the delivery of high-performance solutions while providing mentorship to junior staff on complex technical challenges.
- Additionally, I managed project pipelines, prioritized development tasks, and worked closely with stakeholders to resolve technical roadblocks and ensure alignment with business objectives.

Arrk Solutions Pvt. Ltd., Manchester, UK   Jan 2018 - Sep2020
Position: Senior Frontend Developer
Project: Totum
Totum is the UK's leading student discount card portal, allowing students to verify their age and university affiliation. Once validated, users can purchase the card online and access exclusive discounts through the Totum web portal.
Responsibilities:
- Collaborated with stakeholders to ensure design best practices and alignment with creative proposals, advocating for high-quality, well-tested code.
- Contributed to web development projects within Scrum environments, coding with Angular, React, HTML, CSS, and JavaScript for both mobile and desktop platforms.
- Stayed up to date with emerging technologies, integrating new solutions based on business goals and regulatory standards for user interface designs.

Xoriant Solutions Pvt. Ltd, Mumbai, India   Sep 2015 - Jan 2018
Position: Frontend Developer
Project: Safetychain, Accenture
- Safetychain is an auditing software where companies will be adding details about their products & this software will be able to auto-generate reports for the US gov. food safety department.
- Accenture is a IoT connected web application which tracks employee's movement in oilfield which will be connected to their mobile & will be continuously sending data to server. In case of mishap this is crucial for the process of evacuation.

Responsibilities:
- Applied SDLC best practices within an Agile environment to deliver rapid, client-focused iterations, collaborating across client services, sales, and design teams to meet deadlines.
- Developed user-centric solutions by translating UX and business requirements into code, utilizing Angular, HTML, CSS, and JavaScript for both mobile and desktop platforms.

Atos India Pvt. Ltd, Mumbai, India   Dec 2012 - Jun 2015
Position: Associate Executive
Project: SLB-InTouch
SLB-InTouch is a knowledge store that allows oilfield workers to search for solutions to on-site challenges. If a solution is unavailable, users can connect with a Subject Matter Expert (SME) to resolve the issue and document the solution in the system.

Responsibilities:
- Led website development by converting mockups into functional web pages using HTML, JavaScript, jQuery, AJAX, and JSON, while designing wireframes, site maps, and content inventories for new site structures.
- Developed and implemented front-end solutions, including page layouts and navigation, utilizing inVision and other tools, ensuring continuous improvement and adherence to user expectations through JavaScript and Object-Oriented Programming principles.
